

# Multi-Purpose Mezzanine

Increase your manufacturing or warehousing capacity fast. Double your floorspace without incurring moving, renovation or new construction costs.

Increase your manufacturing capacity fast with a high-performance Cogan mezzanine. Whether

you need a little or a lot more floor space, Cogan has the perfect mezzanine solution to fit your needs, your timing, and your budget. Our engineers will work closely with you to transform unused vertical space into a profitable storage area. Just send us your additional space requirements and we will return an AutoCAD drawing showing precisely how your mezzanine will be configured within the existing layout of your facility, matching its exact height, area and load requirements.

Quality, strength, and efficiency to keep your process running smoothly. From conception to installation, a Cogan mezzanine is innovation at it's best.

Don't be afraid to challenge a Cogan mezzanine! Constant movement and vibration can be tough

on a structure, but a conveyor support mezzanine will live up to the rigorous pace of your work environment. When high-speed conveyors move over 40,000 packages a day, you need a support structure that won't flinch under pressure. Not only will a Cogan mezzanine double your floor space, but the wide span design will increase visibility, functionality and safety for both your workers and your equipment. Convert your unused overhead space into a profitable conveyor support mezzanine.

# Conveyor Support Mezzanine

# Multi-Level

## Mezzanine

Install a multi-level mezzanine and maximize your cubic area for a greater ROI than any other growth alternative.

---

In today's reality, effective warehouse management is an essential business skill. Between unexpected logistical issues, product handling and distribution, maintaining a productive operation is an ongoing challenge. Increase efficiency with a Cogan multi-level mezzanine. Unlike new construction, which qualifies as a building modification, a mezzanine is a piece of capital equipment. You benefit from a full-fledged storage platform without the high costs associated with expansion or moving to a new facility.

# Online Distribution

## Mezzanine

Stock and ship a massive amount of inventory quickly and efficiently. Cogan multi-level mezzanines are designed for high volume.

In today's online marketplace, vendors must offer a large selection of products in order to remain

competitive. With a world of merchandise just a click away, shoppers expect to find exactly what they want, at the best price and with the fastest delivery. For the seller, stocking, picking and shipping these items is an enormous feat. Speed and organization are key. The addition of a mezzanine can easily double the available workspace in your distribution center. Seamlessly integrate shelving, racking and conveyor systems to move your inventory quickly and efficiently.

# Equipment Platform

## Mezzanine

Boost safety and productivity on your production floor with a Cogan equipment platform mezzanine.

---

By adding more convenient access points to critical functions, a mezzanine can boost safety and efficiency on your production floor. Designed to integrate seamlessly with your existing operations, an equipment platform mezzanine provides secure passageways over machinery. This is ideal for equipment that must be accessed from above, such as heating and cooling equipment, compressors, and piping or ventilation units. Necessary maintenance can be completed without disrupting the primary work area below.

# In-Plant Office

## Mezzanine

Create a fully integrated in-plant office above your production floor. Just another way Cogan mezzanines make your space work for you.

In a busy warehouse setting, office space must often be sacrificed in favour of larger production

zones or storage areas. Paperwork accumulates and critical administrative tasks fall to the wayside without a designated work area. By creating a fully-integrated in-plant office above your production floor, a Cogan mezzanine will effectively put an end to these limitations. Create ample room for computer stations, filing cabinets and other office equipment. Your elevated workspace remains in close proximity to relevant operations without compromising production efficiency.

# Parts Inventory

## Mezzanine

Maintaining an orderly Parts Department can be a daunting task. Install a mezzanine and create ample space for shelving, computer stations and other equipment.

Lack of proper inventory management can lead to overspending or even worse, failure to supply

service departments with sufficient materials needed to fill orders and make repairs. Install a Cogan mezzanine and create plenty of space for shelving units, computer stations and other equipment required for accurate inventory control. Increased square footage also facilitates in-plant traffic circulation and item accessibility. Easy flow patterns through clearly marked inventory bays work to significantly boost speed and reduce pick costs.

## Standard Colors

Standard colors are applied to all products and are automatically included in the material price on your quote. Unless otherwise specified, all standard colors are powder-coated for a durable, long-lasting and maintenance-free paint finish.
